4. Social Media Awareness Months/Events

- a. Our action team will be trialing a new platform called “Trello” to help members generate content for social media posts. Social media posts will then be funneled through the Health Department to post on health department social media pages. We are trialing to see if this platform works for all action teams. This will help us see what other action teams are posting. Chris walked through process of adding content to Trello. Goal is to come up with two posts per action team each month to see if we can generate enough content to host our own Healthy Communities social media page.
- b. Group discussed potential facebook posts.
 - i. Facebook post about hugging boundaries. It’s never too early to start—teaching young kids about bodily autonomy.
